

# UMBRACO DEVELOPMENT

At Tercer Planeta we specialize in one of the best tools for content management in the market, open source and free licensing: **Umbraco.**

Umbraco is not only a CMS but also an adaptable and extensible development platform based on Microsoft technologies.

**We know how to create and implement the most suitable set of tools that Umbraco offers to adapt them to your specific project.**

That allows us to:

## **CREATE**

visually appealing websites from scratch

## **MIGRATING**

sites from other platforms

## **USE**

third-party modules to add capabilities to your deployment

## **APPLY**

multilingual support

## **IMPLEMENT**

your CMS and associated databases in Azure environments or dedicated servers

## **INTEGRATE**

your CMS with automated marketing tools

## **REVERSE**

changes back to previous versions
