*Life started in Oceans,
Plankton is the food of Life,
Plakton is Life.
Plakton is bio footwear for enjoying Life,
Environmentally Friendly,
It makes you feel good,
It makes you feel lovely.
It makes you feel in balance with Nature*

Plakton, Positive Fashion

**Inspired by nature
Handmade in Spain**

We are a brand Made in Spain dedicated to the production of Bio Footwear. Our company and products are totally inspired by Nature. We have a deep sensitivity to the environment and biodiversity, especially the sea and oceans, which are threatened more and more by the serious problem of plastic. That is why we included in our Logo the Blue Whale, a majestic animal in danger of extinction that must be conserved and protected by all of us. We keep on asking the same question on and on; if

we cannot coexist with these incredible animals, what future awaits us?

Because life started in the Oceans and plankton has been the food for life for many years and the sustenance of the largest creatures. That is why whales embody the values that guide our brand through a path to create sustainable and eco-friendly products.

Plakton, since 1995, has been constantly developing the ideals that help improve the Ecosystem with each collection that has been made year by year. Its designs are a creative example that demonstrates elegance and style can hold hands with the Planet and Society.

**TOGETHER, WE
CAN CLEAN OUR
OCEANS.**

PLAKTON supports the SEAQUAL™ Initiative

WE REVALUE

Upcycled Marine Plastic

Join us @seaqualfriends

SEAQUAL™
Licensee

EVERY YEAR, 12 MILLION TONS OF PLASTIC IS DUMPED INTO OUR OCEANS.

There is no single solution to plastic pollution and SEAQUAL™ embraces any project that can bring value to plastic waste. SEAQUAL™ is creating a model for a virtuous economy based upon the management and recycling of the more difficult forms of post consumer waste. We lead by example and in doing so help to drive humanity towards a circular economy.

SEAQUAL™ collaborates with fishermen, NGOs, and ocean-clean up programs to retrieve all types of waste from our oceans. SEAQUAL™ revalues the plastic portion which is returned to industry as 'Upcycled Marine Plastic' and then transformed into beautiful, new, sustainable products.

Cork: A Natural Gift

The life cycle of cork as a raw material begins with the extraction of the cork oak bark. There are about 2,200,000 hectares of cork forest worldwide; which nearly 30% is located in Spain. Cork is really important for us, it is natural, ecological, recyclable and biodegradable. It has really powerful qualities: it is resistant, light, insulating, thermal, elastic and fireproof.

Its extraction is done without cutting down the tree, with special axes that skillfully cut the bark without damaging it. After the bark cut, the Oak tree regenerates and creates new layers, making it a sustainable resource that allows the tree to keep on developing and living.

Another really important aspect of the Oak tree is that its unique cellular structure is able of retaining carbon dioxide (CO₂), main responsibly of global warming. It is estimated that cork forests worldwide retain CO₂ emissions produced by more than 8 million vehicles a year. A very valuable contribution in our fight against global warming.

All these extraordinary values make Cork the perfect material for Plakton to develop its soles. 100% Eco-Friendly, the base of Plakton.

Quality and Design Made In Spain

We manufacture entirely in Spain, specifically in Elche, cradle of our country's footwear. The hands of our expert craftsmen guarantee the high quality of our Bio Premium Footwear. It is ergonomic and comfortable from the first step, thanks to its breathable cork sole, perfectly adapted to the natural shape of our foot, ergonomically manufactured with selected natural materials such as cork, to favor the minimum impact on the environment and reduce the footprint of carbon and CO2 emissions.

Our original designs are inspired by the Mediterranean. Our complete collection ranges from charming flat sandals to sophisticated wedges of flattering heights that transmit comfort and well-being.

Plakton complies with a strict commitment and corporate social responsibility both with our employees and with collaborators and customers. Therefore, both the brand and our suppliers are governed by a strong code of ethical conduct in favor of the labor welfare of its employees, rejection of child labor, protection of the environment and compliance with the Law.
