practices, and strategies

Integrated Solutions

Our Service Model

Our Service Model is designed to align with the needs of our customers and provides individual services of our Specialty Disciplines or Integrated Solutions built for 4 different Logistics Networks Models.

We organize our people and other capital structures based on this model, which enables us to design the solutions required by our clients from the start and to modify them as their needs change over time.

Certifications

OEA Certified
ISNetwork Registered
TRACE Certified
PMI Experts on board

Our Network of Global Customers

Our clients are complex global organizations that are leaders in their markets. These companies need different configurations in their supply chains to meet the wide variety of requirements of their customers while they need the ability to dynamically adjust to them, just as the needs of their customers change.

Winners of the National Logistics Award 2018 “Tameme Award”

Logistics Service Provider Category

Winners in the "Logistics Service Provider" category thanks to the coordination of maneuvers, customs clearance and transport for the construction of a combined cycle power plant in the municipality of Ahome, Sinaloa. Our work contributed to the production of efficient electricity with a low impact on the environment.

Coverage

Local

- › Nationwide coverage in Mexico
- › Headquarters in Toluca

Logistiks Conducting™

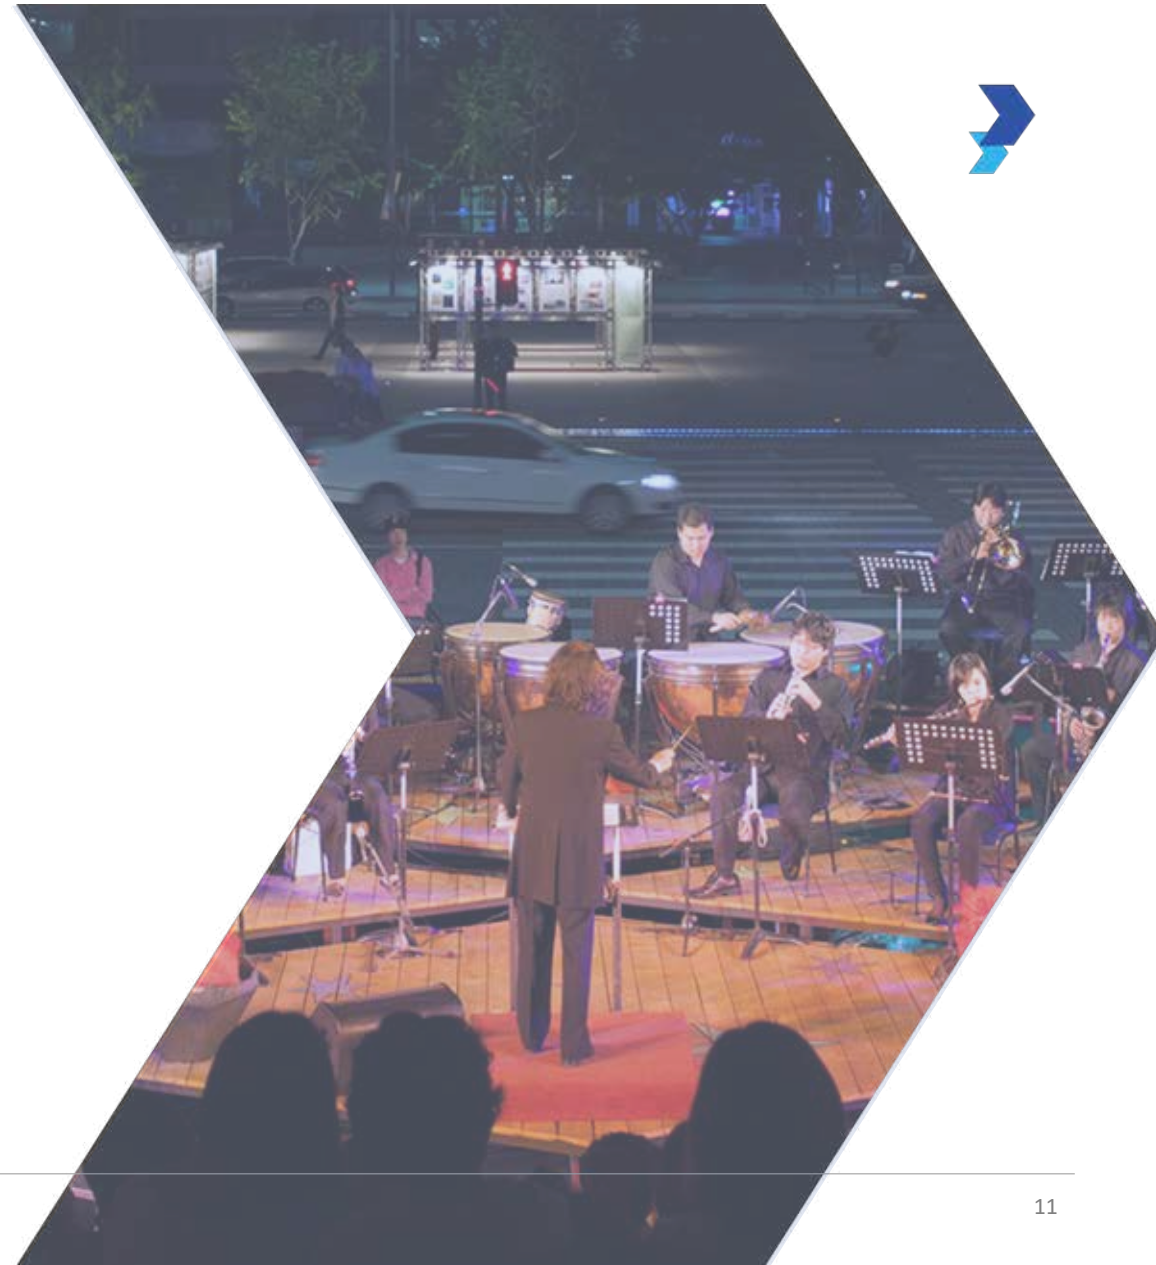

Our Integrated Solutions Method

Logistiks Conducting

Logistiks Conducting is...

...the organization of multidisciplinary networks of logistics capabilities – carriers, customs brokers, riggers, warehouses, surveyors and other experts –

...and the orchestration of their performance to help our customers' fulfill their intentions and business missions.

Industry Solutions

Our solutions are created to attend the different supply chains of multiple industries, whose critical logistics is decisive for the **success of your business** and facilitating all your processes so you can focus on your core activities confident your logistics are handled in an effective, strategic and competitive manner.

- Mining
- Oil & Gas
- Power Generation
- Petrochemical
- Automotive
- Aeronautics
- General Manufacturing
- Pharmaceutical Equipment

Logistiks Conducting™ for Continuous Flow Networks

We provide complex combinations of services that involve a large number of constant operations, including both the coordination of the different modes of transport, and the management of international trade through multiple customs ports of entry and different trade regimes for inbound and outbound traffic

Services offered:

- Transportation Services
- Foreign Trade and Customs
- Cargo Handling
- Storage Services
- Risk Management

BLK Global Logistics

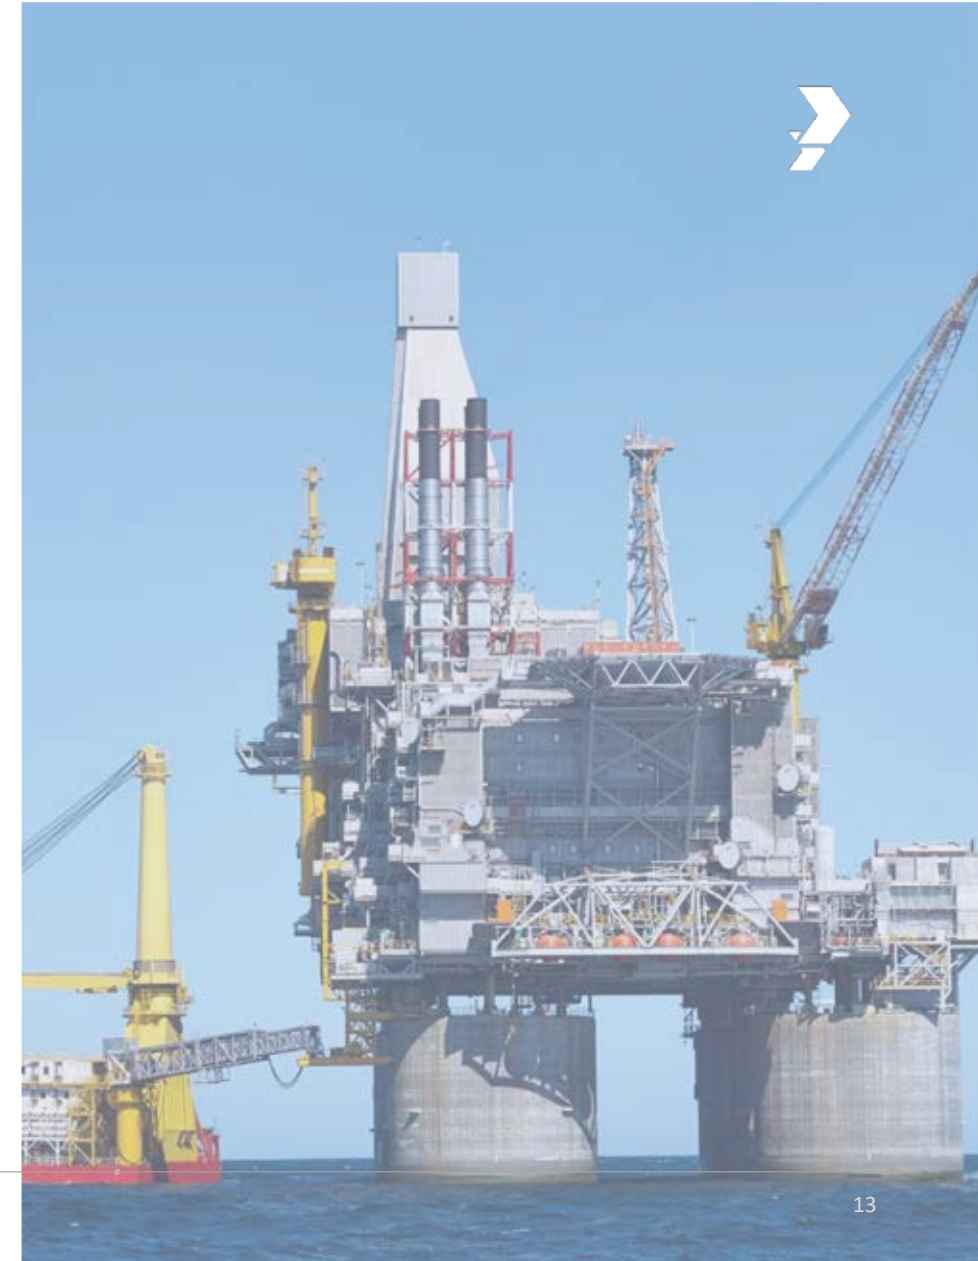

Logistiks Conducting™ for M.R.O. Support

Our MRO Division manages the coordination of support services for planned maintenance, repair and overhaul operations of large capital assets.

Customers of this división include:

- › Oil & Gas Infrastructure
- › Power Generation Plants
- › Petrochemical Plants
- › Mining Operations
- › Telecommunications Infrastructure

Logistiks Conducting™ for Projects or Campaigns

Our Project Division was built to cover the need to transport large volumes of cargo from a wide variety of part numbers - often including large components.

Dimensions and weights - under strict delivery schedules like the ones we usually find in exploration campaigns and construction projects.

“No other organization - national or foreign - has participated in more infrastructure projects in Mexico”

Logistiks Conducting™ for Emergency Response

When time is of the essence you want to put together a team with the most knowledgeable members available.

Our Networks of Logistics Capabilities allows us to respond with velocity to contribute to our customers' efforts to recover a lost capability.

“Our Customers can count on us to cooperate and collaborate with their other partners to enable the fastest response time.”

› Digital Services

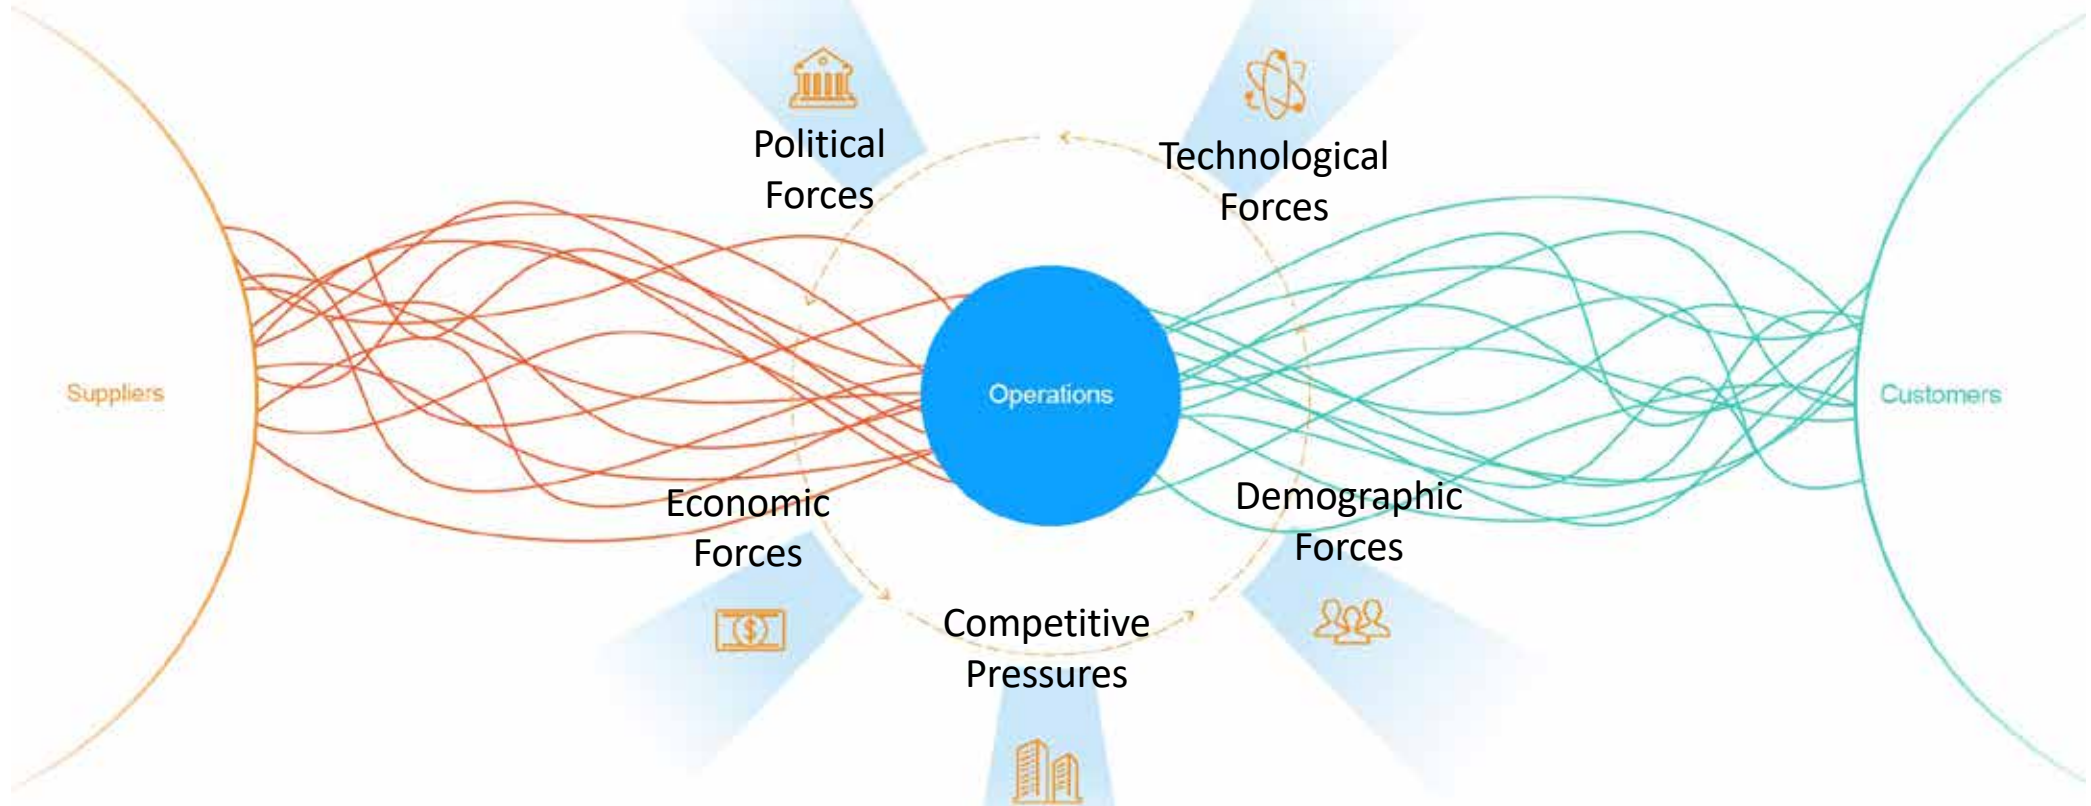

We live in the most competitive, globalized, complex, technologically advanced and rapidly changing marketplace in the history of human kind

**We live in the
4th Industrial Revolution**

The Complexity and Critical-ness of Logistics will continue to increase due to the forces and the competitive pressures acting on the marketplace...

...Managing the increasingly complex Logistics Networks with Tools, Processes and Procedures from earlier eras is Ineffective and Uncompetitive.

We have built our *Logistiks Conducting Platform* (LCP)

- a growing collection of the most advanced digital tools and systems for the Management of Logistics -

...to enable the digital management of our customers' increasingly complex and dynamic logistics networks.

Logistiks Conducting Platform (LCP)

Digital Logistik Conducting

A New Class of Logistics Services for IR#4

Digital Logistik Conducting is...

...the organization of multidisciplinary networks of logistics capabilities – carriers, customs brokers, riggers, warehouses, surveyors and other experts –

...and the orchestration of their performance

Enabled by Digital Tools and Technology

...to help our customers' fulfill their intentions and business missions.
