

Beginning 2014

Farm name: RAC Shrimpfarm.

In remembrance of:

Rudsel A. Comenencia

This brochure is especially for those, who want to invest in their own business and see their money grow steadily in the near future!

In 2014 we started our test Shrimpfarm, for which we started doing research since 2010. The research was of how to cultivate the finest and, best eating, salt-water shrimps and the ins and outs of the sea.

We are cultivating the White Leg shrimps, which is a salt water shrimp. The best!!

In our backyard we started our test farm which enhanced our expertise!

Present 2017

Somewhere September 2017, we found the most essential part of our formula to raise our shrimp to adulthood, meaning ready for consumption, without many problems. Great Achievement!!

With this success we are moving on!

We dismantled our experimental farm together with the lab, so we could do what we originally intended, to go huge!

Future 2018 and further

Location: Sta. Catharina

Area: 50.000m2

Expertise: 4 years of experience in shrimp cultivating.

After 4 years of testing, we can proudly say that we are the shrimp experts on the island. We acquired the needed knowledge and experience to conduct a successful business!

We love our environment, therefore our farm is:

Always Green and Always Clean

Most of our used water will be recycled, the rest of the water will be given to our self-made **Mangrove park**, which has sea life in it!

The whole farm of about 20.000m2 will be using a Reverse Osmosis for clean fresh water and a solar panel and wind mill will be used for clean energy!

Farm name: **RAC Shrimpfarm N.V.**

Established: November 2018

Stocks: 20.000 pieces

Each: 150 Ang.

Interested in buying/investing in our stocks, please contact management at:
