Exotic

Dare to try!

The heart of palm is a delicate food, with palatable flavor, nutritive, delicious and mostly healthy, fat and cholesterol free. It contains fiber and carbohydrates in a balanced way likewise high potassium level.

The choice is yours, choose to live healthily

Canned palm is nourishment that is extracted from the heart of the stem of the palm of the Bactris Gasipaes, typical of the Amazon rainforest that was introduced to the region of the Tropic of Cochabamba, Bolivia.

To improve the living conditions of farmers, Plurinational State invested in the installation and operation of two processing plants, both under management of Insumos Bolivia, which trained the daughters and sons of farmers for them to learn about the development of the canned palm, which is processed mainly by women of the region.

Factories have the infrastructure and equipment specially designed and with the implementation of Food Measures assurance and safety guarantees the obtention of preserved food with a useful life of 4 years.

Canned palm is a high- quality product with high culinary quality, delicious to taste and versatile, reasons why it is greatly appreciated and required in the major markets of the world gourmets.

Because of its composition in protein and minerals, it is appropriated for people who hold a diet designed to improve the nutrition of their families or for the ones who are looking for leading a healthy life. In addition, being a product with very few calories and high in fiber is ideal for diets.

Palm processed by Insumos Bolivia is an "environmentally friendly " agricultural product.

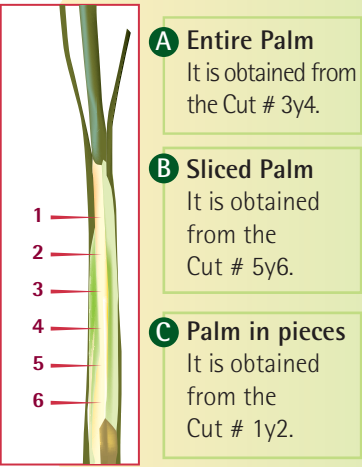

It is also important to note that in the process of developing the palm, its organoleptic characteristics are not modified.

It contains vitamins and minerals needed for body function

For its fiber content, it helps to improve digestion. It also contains cholesterol-free protein.

It covers daily needs of manganese, an essential mineral that keeps healthy our bone structure.

Our presentations

Entire Heart of Palm

These are the parts of the middle sections of the heart of palm (cut No. 3y4). It is the most demanded by the market, because it is a product that can be used in a variety of dishes prepared to innovate. Its texture is firm and palatable.

Sliced Hearts of palm

This soft and delicate flavor piece is obtained by cutting the base of the meristem (Cut No. 5y6). Uniform in diameter and nice texture, it is suitable for using in salads, pizzas and countless dishes, as well with multiple ingredients.

Hearts of palm in pieces

Are generally obtained by cutting the upper ends of the base and meristem (Cut No. 1y2). They are somewhat heterogeneous pieces, but have a regular size. For its mild and delicate flavor is perfect for salads, since it is only needed to open the can, drain and apply.
