# TECHNOLOGIES

## RABATAN

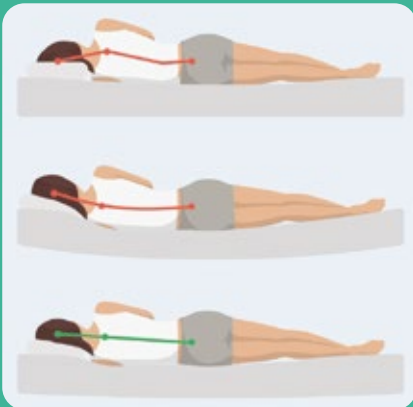

Profiled and cured wrapped in latex. The progressive density provides the correct distribution of the weight of the body, aligning posture.

**HIGH RELIEF** The tips provoke an auto-massage, known as a do-in massage.

**LOW RELIEF** Help with the circulation of air between the body and the mattress, making it possible for the mattress to breathe.

- Hypo-allergenic, anti-mites and anti-mold;
- No need to rotate;
- Has progressive density and an increase in the activation of blood circulation.

**What are you waiting for to acquire your mattress with so many benefits?**

### TOO HARD

A hard mattress makes the relaxation of the body more difficult, since it puts pressure on the skin and the muscles, harming blood circulation, causing cramps and tingling.

### TOO SOFT

A soft mattress can be comfortable in appearance only; It does not sustain the muscles that support the spine, compressing it on one side and stretching it on the other.

### IDEAL MODEL

Not too hard, nor too soft. Your mattress should be firm and flexible, in other words, it should be comfortable and, at the same time, give the necessary support for all the weight of your body.

## FOR YOUR INFORMATION

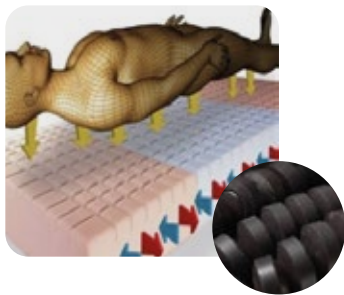

How many years of use does your mattress have?

- In one year a conventional mattress accumulates more than 1 million mites;
- There are more than 30 thousand species of mites;
- The preferred place for mites is the mattress.

**BIOPOSTURE THERAPEUTIC MATTRESSES ARE MATTRESSES THAT BREATHE!**

## MAGNETOTHERAPY

Considered as a therapeutic treatment, a magnetic field is formed by magnets of Barion Ferrite, capable of generating constant magnetic energy of up to 800 gaus, similar to the Earth's magnetic field. That energy is responsible for the balance of body and mind.

- Fortifies immune system;
- Reduces cramps;
- Improves oxygenation of blood;
- Combats migraines;
- Reduces stress and fights insomnia.

## LONG INFRARED

Tablet made with various minerals, among them: platinum, titanium, and aluminum. Long infrared can be defined as something similar to early morning and late afternoon sunlight.

- Improved blood circulation;
- Helps in bone calcification and vitamin D replacement;
- Fights varicose veins and helps in the treatment of migraines;
- Eliminates toxins from the body;
- Relieves low back pain and stiff neck;
- Helps treat degenerative diseases and reduces cramps.

## NEAR INFRARED

The EVI DIAMOND Infrared insert is the greatest infrared technology revolution of the 21st century. Launched in the Brazilian market in 2014 by INFRABRAS, it is the first insert for mattresses and pillows to emit Near Infrared energy.

\*With vibrational effects on water molecules, the EVI Diamond waves accelerate the elimination of acids and fats from the body, anticipating the user benefits.

## VIBROTHERAPY

Bioposture Mattress Vibrotherapy devices emit fast vibrations and electromagnetic waves through electronic sensors, with remotely adjustable frequency and intensity. When you lie on the mattress, your entire body is massaged.

- Improved blood circulation;
- Reduces stress;
- Induces sleep;
- Relieves tiredness and provides relaxation of the body and mind.

## BIOQUANTUM ENERGY

We lose energy throughout life, for this reason, our body, our skin, our nervous system, and everything else that makes us up, feels the effects of age. The bio-quantum energy present in our mattresses restores energy levels without pain or any other discomfort and with complete comfort.

- Activation of the renal and adrenal system;
- Activation of serotonin production;
- Assists in pain, fibromyalgia;
- Assists in bone and cartilaginous diseases, and stimulates insulin production in the body;
- Activates testosterone;
- Activation of hormones that produce dopamine;
- Stimulation of intestinal peristaltic movement;
- Balances thyroid function.
