

#### PASSAGE OF 116 YEARS (1904 TO 2020) EXPERIENCE AND DEVELOPMENT

1889 DURUS originated by the founder of Soccer ball in 1889 cousin to Ghauforee Sandal.

1900 DURUS founder MR. A.D sandal joint to the originator as an apprentice in 1900 and successfully learn the engineering of soccer balls.

1904 DURUS is serving soccer ball industry as pioneer with four generation from 1904.

1919 DURUS introduce themselves a quality manufacturer soccer balls in Indian continent.

1929 DURUS first pattern registered Zeenat design and was sold in British ruled continent with its brand name.

1940 DURUS establish their branches in Bombay, Colombo directly and distribution in England, (Singapore, Malaysia, X-Malaya) and Rangoon.

1956 DURUS started manufacturing of soccer balls from vegetable leather passed through chrome tanning leather, pre-stretched leather technology for retention of the shape with organic inorganic, PU Pigment for scratch proof and water resistances finishes.

1958 DURUS made the ball with factory lace, German flap and French hole with rubber sheet stamp bladder, latex bladder, hundred systems of valves and butyl bladder with most modern accurate laser cutting valve.

1959 DURUS introduced 32 panel designs (pentagon & hexagon) in chrome leather later with pigmented finishes black and white and design printings.

1960 DURUS first introduced cutting of panels by mechanical cutting press with cutting knife later with perforated needles.

1962 DURUS have replaced the flax twisted fibber thread to polyester pre-stretched to proof for (30) pound stitching force and avoids the stain from the water.

1964 DURUS innovated hydraulic leather stretching machine to remove the stretch-ability of the leather for soccer balls.

1972 DURUS produced skill labour for soccer ball from factories to stitching centres totally avoiding child labour and controlled labour with control of quality, quantity and labour cost.

1974 DURUS entered into new technology with polyurethane material mounted on pre-stretched leather and later with textile material poly cotton and polyester lamination with natural latex glue bearing self curing, anti-fungus chemicals fulfilling extra hygienic requisites fulfilling extra hygienic requisites.

1976 DURUS invented the ball in polyurethane, semi polyurethane and vinyl materials with retention of shape, weight, bounce & pressure according to the international denominations.

1980 DURUS welcome the development of cadmium & AZO free printing ink for better impregnation, adhesiveness and rub proof by Toyo, Sericol, Keck industries from manual stamp printing to automatic screen printing machines.

1990 DURUS is a part of rich soccer ball history ensuring its enviable place in generations to come.

1994 DURUS increased production for 3000 balls per day with capacity 5000 balls a day.

2004 DURUS moving to their new mega factory equipped with all modern machineries on their 100 years anniversaries to serve the industry with more energetic move for another centuries.

2006 DURUS is managing 5000 balls a day to meet the heavy demands of their patrons in their new premises and has the capacity to make 7000 ball a day.

2008 DURUS is well renowned to their innovations, T.Q.C qualities capabilities and service capacities and appreciated by their worthy partners from (50) countries of the world.

2010 DURUS launched 100% PU material pethelate free material for all category balls avoiding PVC material

2011 DURUS PU material balls created huge demand, DURUS have increased production up to 10000 balls per day

2012 DURUS installed big lamination machine for machine stitched balls DURUS started manufacturing machine stitched balls due to heavy demand of promotional and training balls

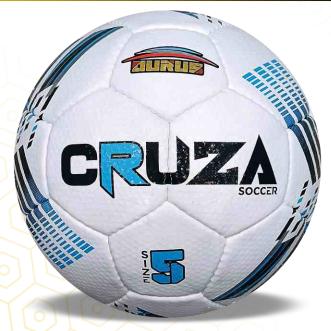

2013 DURUS installed thermo bond balls on imported Machinery from Taiwan and doing comfortable business in this line.

2016 DURUS installed Hyper sewn balls on imported Machinery from Taiwan and doing comfortable business in this line.
