Welcome

Discover with us infinite possibilities to improve the traceability and transparency of your operations, develop your own smart contracts and get more autonomy and control over the results solving your concerns and finding solutions with Haverö consultants, experts in new technologies.

Haverö

In order to create a mining company committed to the Blockchain technology, Haverö was born.

On December 16, 2017 the first Hackathon sponsored by Santiment is organized in OurSpace, Marbella. The "SmartCars" application for renting cars between individuals, using the Blockchain, won one of the prizes, and so the motivation of the team to continue investigating arose.

On February 20, 2018 we settled in Madrid as a base of operations where we began to develop methods of analysis and projects with Blockchain to optimize and solve problems.

Today we put at your disposal all our advances.

Services

In Haverö we put our knowledge at your disposal in order to find and develop solutions that meet the specific needs of your business.
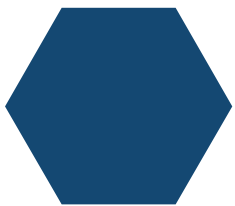

Given the passion of our team for new technologies, we develop all kinds of applications assisted by powerful tools and modern programming languages.

In addition, we build miners configured and optimized according to the investment desired in each project, since the objective is always to achieve maximum profitability and satisfaction.
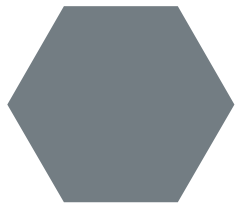

BLOCKCHAIN SOLUTIONS

We consider any challenge to improve your business, whatever your profile. With the Blockchain technology, we will offer you endless possibilities to achieve an indisputable competitive advantage.
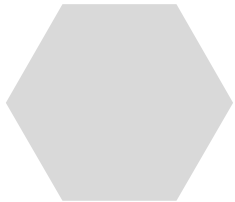

SOFTWARE DEVELOPMENT

We help you identify the technological needs of your business, choose the solution that best suits the company and design a plan to optimize it, with a vision of scalability.

STRATEGIC & TECHNOLOGICAL CONSULTANCY

With our experience in the creation of intelligent contracts and applications based on Blockchain, construction and optimization of mines, maintenance of equipment and analysis of profitability and viability, we can face any challenge.

MINING & SYSTEM MAINTENANCE

Before making a decision, we like to analyze all possibilities. We consider all the variables and parameters to adjust your investment to the best technical configuration, in this way, each machine is designed to achieve the highest profitability.
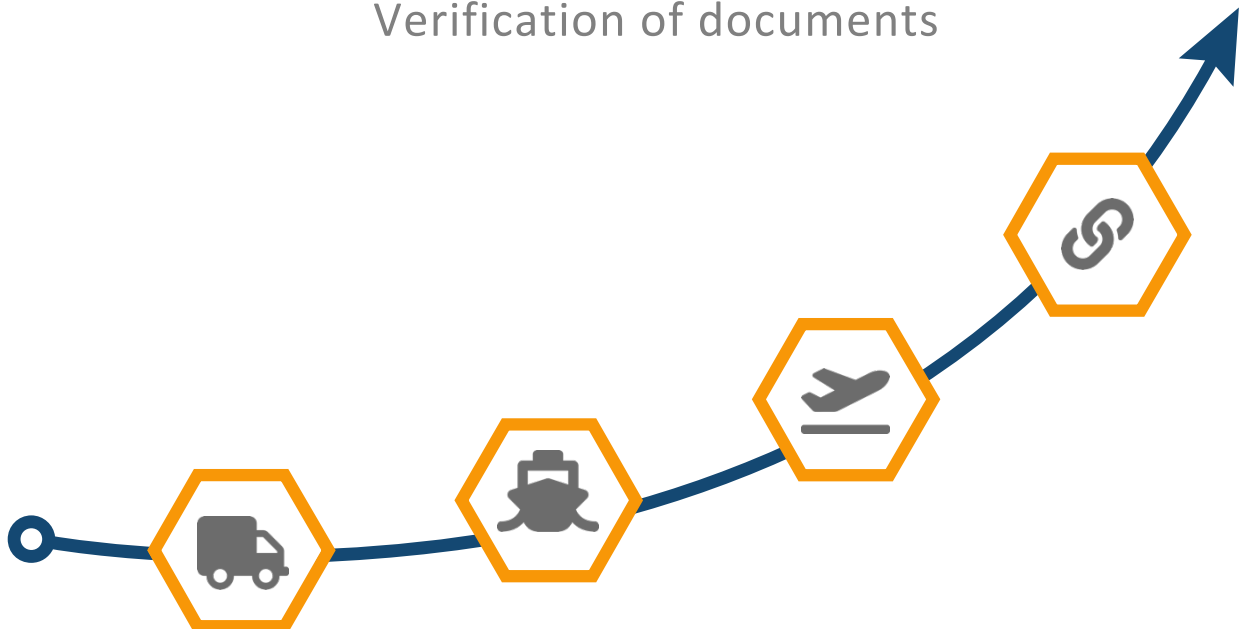

Practical Applications

Personnel Management Systems

Applications with SmartContrats

Creation of Tokens & Cryptocurrencies

Proof of provenance and traceability

Verification of documents

Partnerships

Our agreements with reputable collaborators in different parts of the world endorse us as creative, innovative, dedicated and committed professionals.

Procomex | São Paulo, Brasil

Haverö actively collaborates with the Alianza Procomex Institute, an alliance of 84 business associations in Brazil with projects in Latin America for the pro-modernization of logistics in foreign trade.

The first work initiative has been the development of the technological update of the Procomex Institute platform, the operational arm of the Procomex Alliance, in which the Haverö developers team has worked intensively in order to create an intuitive, simple platform, adapted to the needs of the market.

Haverö will continue to actively collaborate with the Alliance Procomex Institute and propose innovative solutions for the improvement of processes through Blockchain technology

Munkkiniemi | Madrid, Spain

Haverö reaches its first collaboration agreement with the Marketing and Advertising Agency Munkkiniemi, which has more than 10 years of experience.

Team

CEO

Karim Tayyan

Industrial Engineer specialized in Industrial Organization at UMA (Spain), USP (Brazil) and UPN (Romania).

My motivation and ambition are born from the personal feeling of growth and continuous improvement. In order to destroy paradigms, my professional, entrepreneurial and creative profile emerges. Expert in development and business analysis with experience in the development of Integrated Management Systems for systems optimization.

I research, develop, coordinate and manage the operations team in mining, exchange markets, investment management and project management based on Blockchain and cryptocurrencies. As well as the development of feasibility analysis, objectives and procedures for the correct and efficient management of technological projects.

CTO

Álvaro Martín

I'm an Engineer in Systems Administration, an expert in IT Management, specialized in the design and development of web architectures and mobile APPs, integration of services and security.

I have a great and extensive experience as Full Stack Web Developer, with great capacity in the administration of servers and in the creation, development and start-up of technological projects.

I research, develop and maintain mining activities in cryptocurrencies to achieve the optimization and profitability of computer equipment. I consider myself a big fan of innovation and Blockchain technology.
