How we operate currently

Work methodology

We develop sustainable leapfroggin-style disruptive industries with communities that need technological support to increase their productivity. In the same context, we offer technology transfer in cooperation with major world brands in terms of better management of natural resources. We work in cooperation with our companies that co-operate to provide scientific, technological and innovative support in the creation of patents,in the pharmaceutical sector, environmental solutions and management of ecosystem resources.

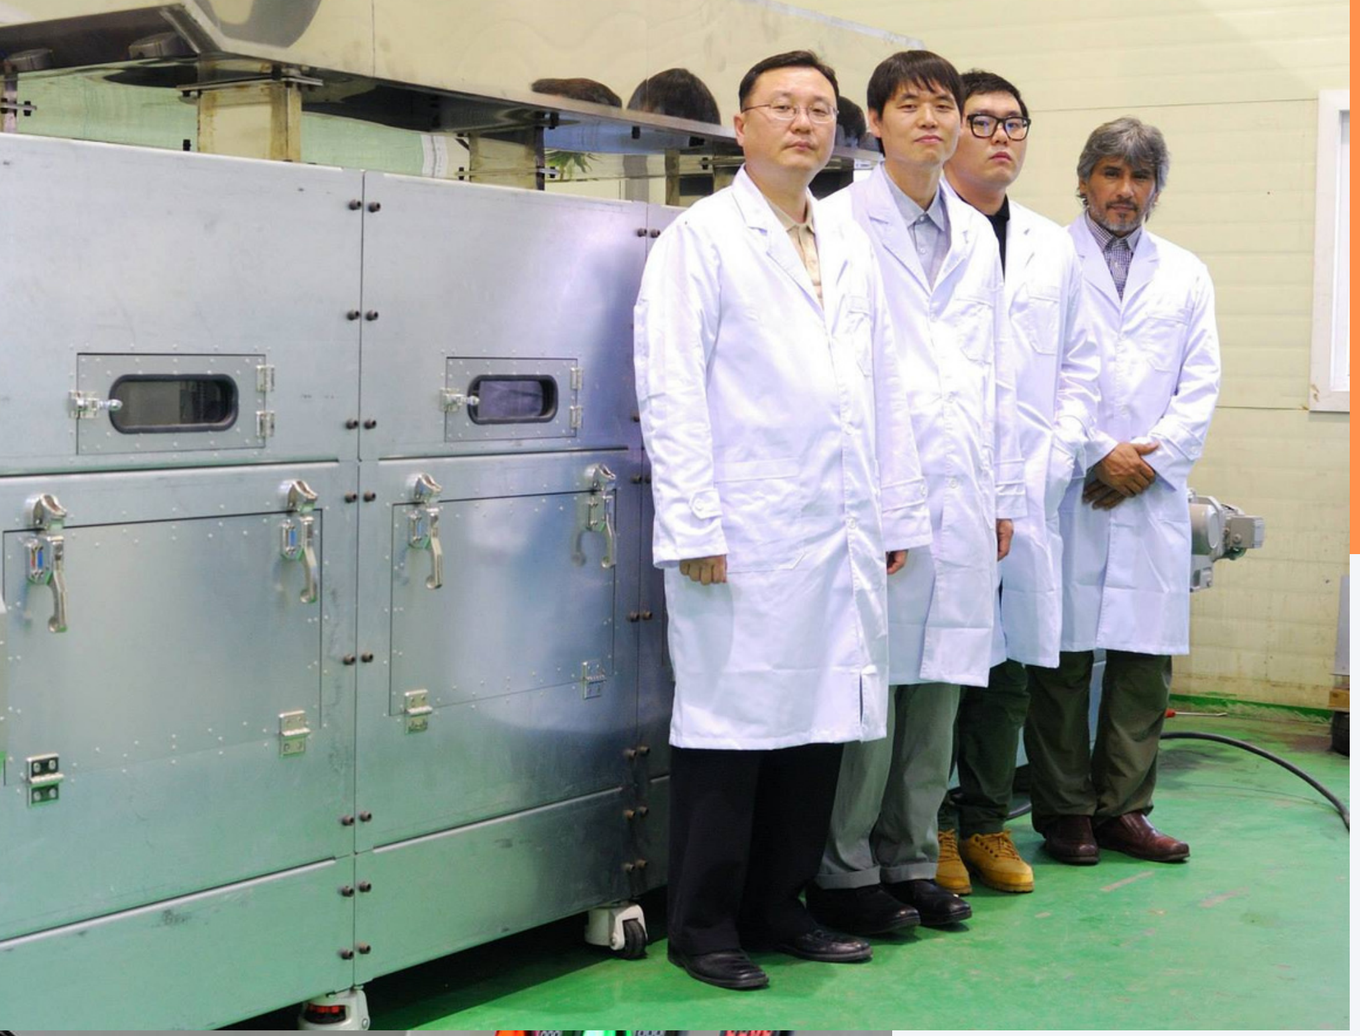
Research and Development

GET TO KNOW OUR JOINT VENTURES

bio-industry

We are partner-representatives of a conglomerate of industries and brands to provide multisector solutions.



We develop projects together with companies through join venture. An example of our work is the cooperation with Chunghaemaru, a company born in South Korea, and we have developed multiple post-harvest solutions for agriculture. We have an operation in Peru. Chunghaemaru is a consolidated brand with more than 20 years of experience in the market. we develop projects with ESG standards with the World Bank for finance in rural communities in panamazonia.
