

Carl Röntgen GmbH - tradition. Experience. Passion.

The band saw blade manufacturer for the wood industry.

Band saw blades are in our blood. And already in the 6th generation

Founded in 1848, Carl Röntgen GmbH is the oldest band saw blade manufacturer in Germany. As a medium-sized family company from Remscheid, we stand for excellent quality and a high level of identification with our customers from all over the world.

We combine tradition with innovation and passion. Test us and let us convince you of our quality!

Manufacture of narrow and wide band saw blades for the wood industry.

> [More information](#)

REPAIR

Repairs of wide band saw blades from 50 mm width.

> [More information](#)

Quality control is a top priority for us. Checking a toothed sheet.

Our promise of quality

Long band saw runtimes and top quality.

The test procedure used by Carl Röntgen starts before the saw is manufactured - with the quality control of the steel and continues through the manufacture to the delivery of the band saw blades. Checking teeth, welds, straightening and tensioning and much more are top priorities for us.

We only use the best quality steel for our saw blades. These include various qualities from Voestalpine (Böhler, Miller, Uddeholm), from which we also obtain UHB 15 and UHB 15N20 band saw steel.

Convince yourself of our outstanding quality and benefit from the extra long running times of our band saws.

Due to our medium-sized structure, quick decisions can be made. This and other factors lead to one of our strengths: flexibility.

Give us a call. Our competent specialist staff will be happy to advise you personally on the selection of the right band saw blade.
