

inalpa[®]

The logo for Inalpa, featuring the word "inalpa" in a white, italicized, lowercase sans-serif font. Below the text is a stylized yellow graphic consisting of two overlapping, curved shapes that resemble a leaf or a wing, with the top curve facing right and the bottom curve facing left. A small registered trademark symbol (®) is located to the right of the text.

Our company

We are a family company founded in 1974 in Pavon Arriba, Santa Fe, entirely dedicated to the production and packaging of fresh vegetables and legumes ready for consumption.

For more than 45 years, and with an extensive network of distributors, we have been bringing fresh, top quality food to the consumer's table in a wide variety of presentations, designed for both home and gastronomic consumption.

Our products are accepted by national distribution chains, first level wholesalers, large supermarkets, self-service stores and small volume businesses, thus covering the entire consumer spectrum.

Our Development Plan aims to maximize agricultural production areas with guaranteed freshness and permanent supply for domestic and international consumption.

Adapting to market demands, we have a wide variety of commercial presentations for each of our products, from 350 g and 840g cans for home consumption to gastronomic presentations such as 3 k cans.

Export

We have extensive experience in foreign trade, both exporting our brands and manufacturing and packaging products for brands and marketing chains in other countries

We are productively and logistically prepared to respond to the requirements of potential customers abroad. Our geographical location, in one of the largest production centers in Argentina, places us in an unbeatable position for foreign trade, just a few kilometers from the ports of Rosario and Buenos Aires.

“To be a reference in the national and international food market for the optimal quality and range of our products and services, achieving the satisfaction of our customers and shareholders through the improvement and support of a human group fully identified with the ideals of the company and the continuous improvement of our Quality Management System.”

Quality from the beginning

INALPA is fully integrated backwards. The fruits of our preserves are mainly produced in the southern lands of the province of Santa Fe, Buenos Aires and E. Rios, where the combination of fertile soils and optimal climate for this type of crops, allow us to produce high quality preserves with a high nutritional value

We have an Agricultural Division which monitors the production of our own fields and those of third parties, in order to ensure quality and supply to our industrial plant in optimal conditions

Our Development Plan is intended to maximise our agricultural production areas, thus guaranteeing fresh produce and a constant supply for national and international consumption

Technology

Inalpa is in a continuous process of updating all its industrial equipment, which places it at the forefront of canning companies in Argentina

It has a total of 3 grain packaging lines, in 300 grams, 840 grams, and 2950 grams. The installed processing capacity in 2 shifts of 9 hours at 300 grams is approximately 900,000 cans/day.

It is the company with the largest packaging capacity for whole yellow corn kernels in the country, with state-of-the-art American shelling and flotation separators, complemented by a packaging line, brine preparation, filling machine with pre-vacuum and Italian Zacmi brand Zanichelli meccanica s.p.a. 600 cans per minute seamer.

All our sterilization is done by cooker, which guarantees the food preservation process. We have 7 static cookers sterifer of Ferlo S.A. machinery of Spanish origin with circuits of 6 fully automated baskets.

The industrial process is completed with labeling and case packing lines for each of the formats, with the incorporation of a fully automatic wraparound packer suitable for trays and film - mod. TC400 Combi

ComPACT-Prasmatic brand of Aetna Group s.p.a. of Italian origin, which allows us to complete the entire supply chain

We have a Packaging Division, with an installed capacity of 580 cans/min, which allows a just in time self-supply with the Canning Division

Third party production

Inalpa S.A. is in the process of **FSSC 22000** Certification, during which it has already obtained the Certificate of Compliance with FSSC DEVELOPMENT PROGRAM LEVEL 2, which represents a new approach to food safety risk management throughout the supply chain, allowing us to meet the highest standards of quality of major national and international companies. Throughout this process Inalpa is audited by various international companies that guarantee the quality management and standards applied in the manufacture of our products.
