OUR SECURITY MEASURES
KEEPS YOUR INFRASTRUCTURE
SECURE

KSR CYBER DEFENSE LTD.

KSR Cyber Defense Ltd. set out to be your support system to help you raise your company's information sector to international standards. We provide world class services to help you improve, maintain, and secure your company's information.

OUR SERVICES

1. Web Application Security and Testing

The KSR Cyber Defense team targets the application layer of your web application to find vulnerabilities. Some of this involves provoking the application by providing unexpected user input, and using the results to manipulate your application into releasing data that should be private.

2. API Security and Testing

The KSR Cyber Defense team scans your API for bugs and unexpected behaviors that could be targeted by potential hackers. Our tests shed light to your API's vulnerabilities which may include SQL injections, authentication bypasses, data exposure, and other issues that hackers can manipulate. Our goal is to ensure that your API's security requirements are met and exceeded.

3. Security Auditing

The KSR Cyber Defense team analyzes your network to determine its health level. Our audit checks your network's control and checks if your practices are compliant with internal policies, and compares your policies to industry standards.

4. Vulnerability Assessment

A Vulnerability Assessment is an essential aspect of an organization's cyber security program, as it helps identify and mitigate potential security weaknesses before they can be exploited by attackers. See how KSR Cyber Defense can help you identify and mitigate potential security weaknesses..

5. Tailored Consulting

We offer customized assessments tailored to your unique requirements. If you require security consulting services that are not included in our listed services, kindly reach out to us and share your specific needs. We are here to assist you in any way we can.
