# Introduction

“**MUSK**” for *Aromatics & Essential oils* is an established B2B company with a direct strategy and focus towards global export relying on the quality and variety of several herbs and plant species cultivated in our homeland; *Egypt* !

Egypt is one of the major export markets in the world and North Africa in particular, renowned for producing and exporting premium quality aromatics and essential oils while benefiting from a wide range of free trade agreements with many countries/regions around the world and “**MUSK**” is proud to be part of this success.

Our name; “**MUSK**” comes from the enigmatic Ptolemaic queen of Egypt; *Cleopatra* who used musk as one of 7 fragrances to excessively scent the whole sun-boat which she rode on her way to Rome to marry Julius Caesar so the scent of her boat can reach Rome early enough and let people get ready for her arrival at the shores of the Mediterranean.

## Manufacturing facility & Quality testing

Our manufacturing partner facility in the South of Egypt is located in Beni – Suef governorate industrial zone, about 80 Km from Cairo; the Capital of Egypt in an unspoiled natural environment which is renowned for its unique and rich floral environment and biodiversity.

Beni- Suef is considered as one of the best plantation source for plants used in preparation and extraction of spices & herbs, carrier and essential oils in Egypt. Our Facilities contain

- ❑ Distillation unit – essential oils & hydrosols
- ❑ Extraction unit – floral absolutes and concretes
- ❑ Cold pressing unit (Expeller) – all cold pressed oils

Our state of the art and well equipped laboratory performs constant analytical, chemical and physical quality testing & inspection of raw materials as well as finished products. We use highly advanced equipment such as GCMS, GC, polarimeter, refractometer, PH and density meter.
