Who are we

SANATUS is an innovative food and ingredient technology industry. Our goal is to offer products that promote health and well-being, making it possible to change the eating habits of the general population, aiming at the reduction and / or elimination of sodium, sugars, dyes, preservatives, calories and fats in food, providing flavor and quality of life for our consumers, which complies with the determinations of the World Health Organization - WHO.

People are increasingly concerned about health, well-being, and quality of life. As a result, many companies that understand the concept and anticipate a change in consumer attitudes are becoming more prominent in the marketplace.
