

## LIGHTING SOLUTIONS

Omega Light was founded by Fernando Kaoru Nagata, after a lifetime working in the lighting market.

Knowing what and how to do it, we started manufacturing and selling luminaires to meet the demands of high technical and design performance, in synergy with architects and lighting designers.

Over time, we improve our processes and results without neglecting our values, but always reinventing ourselves.

*OUR PURPOSE*

***Spread the culture of lighting as a transforming agent in people's lives.***

*OUR MISSION*

*Guarantee with excellence the delivery of products and services that meet the needs and applications of our customers, valuing the relationship with commitment and proximity.*

*OUR VISION*

*To be the benchmark company in the lighting market, being recognized for its comprehensive service in value chains, from understanding the need to the personalized delivery of its solutions, ensuring customer satisfaction and loyalty.*

# EVOLUTION WITHOUT FORGETTING THE PRINCIPLES

## DESIGN

We believe that design is the ideal tool to offer products, solutions and services to our clients with:

Value added proposal, innovation, identity, experience, personalization.

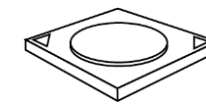

### awards

MCB

## INNOVATION

Our luminaires are made with the latest technology modules, combining efficiency with quality of light.

More vibrant colors and whiter whites.

Our strategic association with the main actors in the world in the development of specific solutions guarantees the delivery of the most up-to-date technology.

## SUSTAINABILITY

Since 2014, we have initiated actions in our company with a focus on sustainability, intensifying the control of waste disposal and the disposal of disposable plastic cups for employee use.

In 2018, we completed our first product project using post-process materials, packaging resins, and damaged hangers.

## BESPOKE

We know the importance of valuing the identity of each of our clients, that's why we offer personalized solutions, adapted to the project.

Customization levels can range from modernizing existing fixtures to developing unique solutions.

## PLANNING

We work closely with our clients, preparing a logistics and delivery schedule based on their forecasts to open new stores.

Agility and commitment to accompany the structured growth of our clients' businesses.

## WHERE WE OPERATE

We are present in several Latin American countries, working with distributors, partners and lighting designers.

We also actively participate in export initiatives with Brazilian agencies and projects that promote trade and foreign relations.
