SOFTWARE TESTING AUTOMATION

QUALITY ASSURANCE

IF YOUR ORGANIZATION:

Is innovative and demanding.

Is committed to its services and its clients.

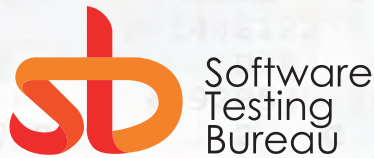

Is looking for an external quality assessment of its systems to validate the solution after any software or hardware change.

Needs a software change or an update, and taking risks is not an option.

STB IS ESPECIALLY DESIGNED FOR YOU

- A comprehensive and solid solution.
- An effective methodology based on best practices and ISO 9001 certified.
- In order to develop a safe and high-quality software.

Software testing requires specialized knowledge and skills, regarding both the methodology as well as the techniques and the tools to be used.

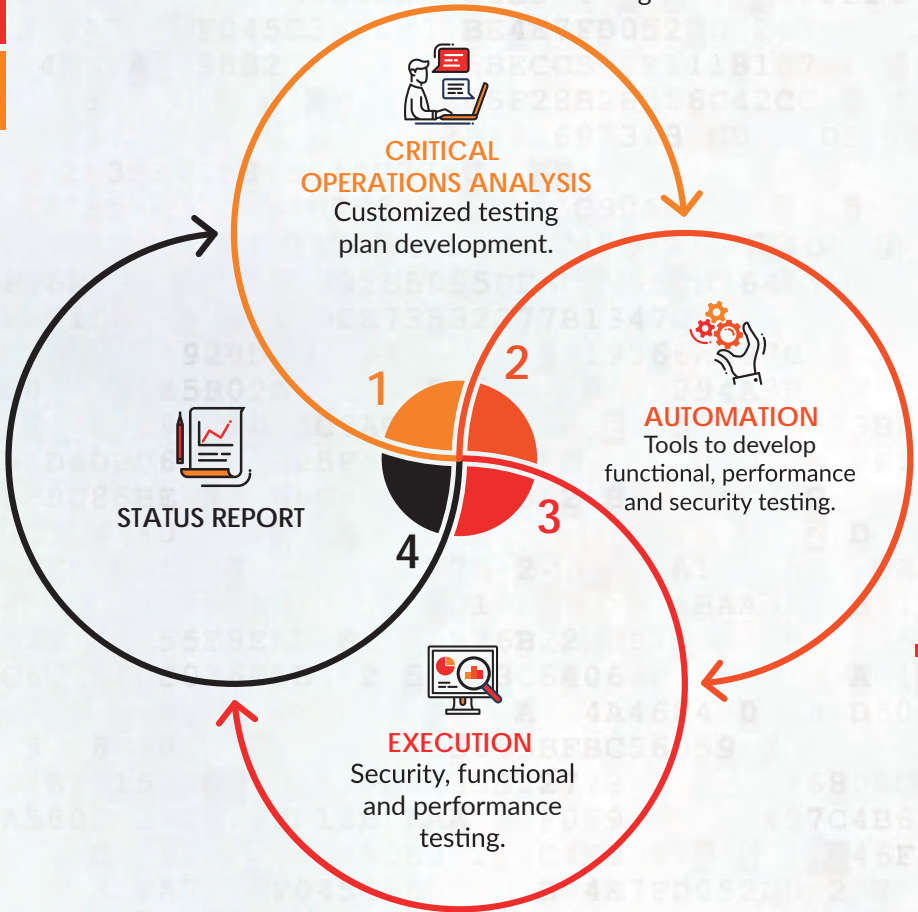

We adapt to your needs:

- Confidentiality.
- Flexibility in terms of resources and schedule.
- We work on-site or we can provide space in our offices.
- Different pricing models (per hour or per project).

OUR METHODOLOGY

to achieve project results for you

A highly professional team of consultants will be working with you, using state-of-the-art tools.

We focus on your business and all of the aspects of the software development life cycle.

How does your company BENEFIT?

INTERNAL

- Quality and security.
- Risk prevention.
- Productivity and operational efficiency.
- Employee performance improvement.
- A complement for the right operation of the business.
- Quick bug detection and resolution.
- Fewer support maintenance hours.
- Competitive advantage.
- Measurable results starting from the 2nd month.

CUSTOMER FACING

- Brand image.
- Innovation and evolution.
- Quality of service.
- Time and effort savings.
- More trust. Fewer claims.
- Satisfied clients, more endorsements.
- Increased services per customer.
- New clients.
- Increased profitability.

WHY SOFTWARE TESTING BUREAU?

Because we do just one thing, and we do it right: We specialize in software testing automation. Since 2005, we have tested critical software. We are your external and independent team, the perfect resource that offers you peace of mind through our automated software tests and our certifications.

Our team leader is Guillermo Talento, a well-known Uruguayan testing specialist. We have worked throughout Latin America, with clients such as Scotiabank, Banco de la República Oriental del Uruguay (BROU), and Telefonica.

We know that software developers must focus on development, so our team of consultants develops, documents, and automates testing, using state-of-the-art methodologies and tools.

Our experience and commitment, along with the flexibility of working either from our offices or on-site, builds the trust required to carry out the best testing.

Contact us and see it for yourself.

“

STB provided us exactly what we needed: security and trust, with an independent third-party certificate which guarantees that our software is safe, which then translated into trust from our customers
