About Qualogy Caribbean

Qualogy Caribbean was founded in 2007 by Qualogy Netherlands and the company quickly expanded its operating field from Suriname to the Caribbean.

100% quality in information technology
Qualogy Caribbean develops high-quality automation services in a dynamic and innovative environment. We do this with a team of highly qualified experts, including analysts, Java and Oracle developers, testers and database administrators. Qualogy guarantees the highest possible quality in information technology and services. We are fast, innovative and customer-friendly.

Oracle Platinum Partner
Many clients contact Qualogy Caribbean to streamline their corporate and client processes and to ensure that all information is available when they need it. As an Oracle Platinum Partner, Qualogy offers a wide range of solutions.

The entire Qualogy organization consists of 350 employees, which allows for an intensive exchange of knowledge between the Netherlands and Suriname. This gives Suriname access to today's most innovative solutions, ranging from cloud, mobile and social solutions to innovations in the field of data science, blockchain and the Internet of Things.

New work methods

This international collaboration also allows for new work methods, such as Agile/Scrum and DevOps. Qualogy Caribbean works efficiently and effectively and can easily present clients with interim results.

Developing in-house applications

Over the years, Qualogy Caribbean has developed many in-house applications specifically for the Caribbean region. Examples include PerformNOW, StudyNOW, StockNOW, RegisterNOW and MDMNOW, all of which contribute to a more efficient work process, more involved employees and more satisfied customers.

QUALOGY CARIBBEAN AND THE GOVERNMENT: OUR SERVICES

Qualogy Caribbean offers the following services to government organizations:

- **IT consulting**
The right technology is crucial for business operations and is key to streamlining information processes and maintaining a good relationship with clients and contacts. Qualogy Caribbean supports you in this with its IT consulting. We are happy to work and brainstorm with you.

- **Custom software development**
We develop smart, custom solutions that help our clients work more quickly and more efficiently. Qualogy Caribbean creates custom Oracle and Java applications. As a service provider, we want to stay ahead of the game. That's why we invest in knowledge about new technologies and offer custom solutions for all problems.

- **Application development**
Are you looking for an application to help you reach your organizational goals faster and more effectively? Whatever your needs, our extensive knowledge and experience allows us to develop applications that instantly benefit your organization. Our solutions can be custom made or immediately ready for use.

- **System integration**
Whether you want streamlined, interconnected and user-friendly systems or to connect your existing systems to the web, Qualogy Caribbean's system integration can help.

- **Database monitoring**
Are you looking for a flexible partner to help you monitor your databases? Qualogy Caribbean is happy to take over your management needs. You choose the service level that suits you best. We offer 24/7 services and on-demand support whenever you need it to ensure that your systems and applications always work perfectly.

- **Software testing**
Before a software product can be used, it has to be tested extensively. Qualogy Caribbean carries out functional and technical software tests on your behalf using new work methods such as Agile/Scrum. The result is a software product that works perfectly, without bugs and with the best possible user experience.
