Introduction

Sietricon was established in year 1983 as a general maintenance services and construction firm. Since then our primary focus has been upon serving multinational service providers and property management firms and individuals, with various services related to civil construction, Steel works, road works & general supplies. Through our extensive task history of constructing ventures we have developed a customer service business philosophy. Proactive and timely customer service is the backbone of our company. We aim to please.

Sietricon is actively involved building exclusive infrastructure projects all over the country. We have completed a number of contracts with various multinational and local companies and individuals. Our Moto is “We believe in quality not quantity”. We are experienced in providing quality services and products.

Sietricon helps client's designs, build and logistics through a network of facilities covering most areas of Bangladesh. This national presence provides our clients with complete designs, engineering and material supply resources that are vertically integrated with Engineering solutions to optimize their operation by lowering their costs and reducing their time to market.

With considerable expansion, the company's revenue from engineering services exceeds those from our trading divisions. With new engineering developments and changes in the field of architecture and construction the demand of these services is on rise. With exponential growth in construction demand, we are fully equipped to face the challenges of tomorrow in collaboration with our sub and partners. With our comprehensive designs and engineering services, we are meeting the requirements of the end users.

The success story of **Sietricon** continues with a vision of state of art technology, hard work with dedicated and qualified teams having highly professional background, vision and innovation skills.

sietricon

Vision & Mission

VISION

Sietricon has set of vision to become a premier solution provider company providing world leadership in complete engineering and technical solution for the construction and engineering society. We are trying to be the leader in client satisfaction, innovation, professionalism and superior quality solution. We are the architect of responsive, fast, cost effective and creative solution to our clients benefit, compensation and their critical needs.

Our Team combines technical excellence with superior understanding of client need and the environment in which our client operate. We are committed to working partnerships with our clients that add value and consistently exceed expectations.

Mission

To form long-term relationships of value with our clients and partners, using quality civil engineering solution and supplying the best resource and latest techniques.

Objective

Sietricon aims to provide the highest possible standard of quality and service in the civil construction work & general supply, giving Clients the best satisfaction the company can offer.

Security & Safety

The manpower of *Sietricon* is its most valuable resource. To ensure a safe workplace for *M/S Sietricon* staff and also to protect clients' investment and facilities, the Group has evolved a strong health and safety culture driven by a goal to achieve “zero accidents” and “zero man-hours lost”. The safety culture has been instilled in *Sietricon* employees with the conviction that every accident is preventable. The company fully acknowledges that by complying with stringent Health, Safety and Environment procedures, zero accidents can be accomplished.

SOME OF OUR HEALTH, SAFETY & ENVIRONMENT PROCEDURES ARE

- Use of full range of Personal Protective Equipment (PPE)
- Use of Safe Tools & Equipment
- Trained & competent staff
- Regular on-site safety audits

ZERO ACCIDENTS AND ZERO MAN HOURS LOST

A yellow and black striped crane hook is positioned in the upper right corner of the page. The hook is suspended by several black cables. The background of the page features a yellow and black diagonal striped pattern at the top and bottom.

The management of *Sietricon* is committed to operate every aspect of the business to those standards that offer the highest possible quality of service to all clients. This is supported by a progressive management style that encourages the quality culture throughout the Company. To reinforce this commitment a Quality Management System, The management is committed to the continuous improvement of the Quality Management System by establishing and reviewing quality objectives for all areas of the company. This is to ensure that the company operates effectively and efficiently and meets the needs of customers.

The effectiveness of the Quality Management System is monitored by planned audits, management reviews and effective corrective and preventive action. All personnel have been made aware of the management commitment to this policy in particular and quality in general and are encouraged to demonstrate their own support to the system by continuous active participation.

Sietricon accords utmost importance to quality and takes pride in the high quality of services. The COMPANY maintains a rigorous quality control programmed that includes continuous awareness, communication and implementation. The quality review process of the group begins from the outset and continues until the work is completed. Quality Assurance Reviews and Audits are meticulously documented through a comprehensive report system. The effectiveness of Quality Assurance Programme is enhanced by addressing to the customers' concerns, analyzing problems and identifying causes and developing effective responses.

QUALITY POLICY

Major Functional Areas

Procurement

Process Control

Inspection & Testing

Inspection and Test Status

Control of non confirming products

Customer First

Sietricon has created a system for receiving, recording, analyzing, forecasting and taking corrective actions on all non-conformities/complaints pointed out by customers. Customer complaints are entertained through corrective and prevention action.

Classification of Training

Sietricon is committed to provide a complete range of training required by its employees to perform their assigned responsibilities. This includes orientation training; job/equipment related training, managerial, quality system training and refresher training.

Determining Training Needs

All employees are annually assessed by their managers to determine adequacy of their existing training / qualification, and to propose what additional training they require.

“Quality, not Quantity is Our Policy”

Sietricon is proud to offer wide range of services, solution and equipments for civil infrastructures, general supplies and road works. We also understand that all clients' needs are not the same, which is why if you cannot see exactly what you're looking for, our expert/technical team will gladly guide uthrough all options available and tailor asolution to better fit for customer

Services & Solutions

Roofing services

Roofing needs can either be as a result of a new house or roofing repairs.. It is also crucial to factor in weather conditions like rain, sun, and wind which significantly affect the roof. Either way, only an expert must handle a roof due to its sensitivity. Roof repairs are more complicated than new roof installation. The contractor needs to have experienced experts as well as tools of work. As a client, it is good to choose a roof which will last for many years even though it may be costly. The common roofs used are shingles, woods, and ceramic tiles

Stone and mortar building

It is common today to have stone or bricks and mortar building. Most contractors are involved in this kind of building. While building this kind of a house consider a contractor with the best tools and machines of work like lifting devices and mortar mixing equipment. Your contractor must also be genuine and reliable to use the recommended ratio of materials which determine the strength of the structure.

Windows installation and repairs

Windows are essential to houses as they offer ventilation, light and above all beauty. Therefore, it is important to discuss thoroughly with your contractor the kind of windows you want to be installed. Windows with aluminium frames are popular in the modern housing. It is possible to remove the old model windows and install the latest versions when working with well-established construction companies.

Services & Solutions

Damage repairs

Various natural catastrophes like storm or flooding cause massive damage to properties including peoples' houses. Some construction companies take up this challenge by equipping themselves well to help people rebuild their homes back to normal. Some of the popular equipment they use is dehumidifiers, heavy tractors and lifting cranes. This is also backed up by relevant expertise and quick response during such emergencies. Our internal work contains but is not limited to foot ways, concrete pads and inclines, framing, drywall, acoustical ceilings, wood trim work, doors, surrounds, locks, and pallet tormenting systems.

Our internal work contains but is not limited to foot ways, concrete pads and inclines, framing, drywall, acoustical Ceilings, wood trim work, doors, surrounds, locks, and pallet tormenting systems. For work not completed in-house, We have a wide-ranging list of competent contractors. Here are services provided by ***Sietricon***:

Services & Solutions

Road Construction Contract

Road construction is all about creating an unbroken passage of appropriate materials that don't have any geographic obstacles for effective vehicle or foot travel. Any road construction contract starts with the removal of earth and rock by digging or blasting. The task also involves building of embankments, bridges and tunnels, and in the course, elimination of vegetation. Proper designing, approval and planning follow to meet various government standards.

National Highway Road construction, Highway Road construction, Express Highway and Interstate Road construction are various forms of roads that are constructed by us. They all are designed and built for primary use by vehicles with different loads. Depending on the need and intensity, different materials and mixtures are utilized to fulfil road construction contract.

As a renowned company, a number of projects have successfully been completed of highway construction by us. Various Highway roads have already been constructed, and the work is still in progress in different parts of Qatar. All our road projects are accomplished with quality tested raw materials and other materials as per the industry norms.

All along the construction projects and rigors activities, More so, the construction work is further supported by putting up signs like Cautionary Sign, Mandatory Sign and Informative Sign on every possible juncture and spots.

“We offer solutions tailored to our customer's needs”

Services & Solutions

National Highway Road construction

National Highways form backbone to any country and Qatar maintains a remarkable network of such highways. We've helped the country immensely in its endeavors to maintain a fine connectivity with rest The country by taking up and finishing construction works of National Highways. With decades of experience, expertise and required workforce, we've been consistently supporting the cause of national highway construction in Qatar.

Interstate Road Construction

Bangladesh has a smooth network of roads and effective connectivity among them which has largely been possible due to construction firms like ours. We have constantly been developing, upgrading and maintaining interstate roads by timely completing construction activities for a better passage among the Qatar Suburbs.

Services & Solutions

Our concerns:

1. Office Supply
2. Fire detection
3. Electrical equipments supply
4. Civil construction services
5. Renovation works
6. HVAC (heating, ventilation, and air conditioning) product supply & installation service.
7. Pre-erection work at construction sites
8. Demolition work
9. Site formation and clearance work
10. Excavating and earthmoving work
11. Scaffolding work
12. Construction works for buildings
13. Construction work for civil engineering
14. For local pipelines and cables; ancillary works
15. For constructions for mining and manufacturing
16. Assembly and erection of prefabricated constructions

17. Water well drilling
18. Roofing and water proofing
19. Concrete work
20. Steel bending and erection, including welding
21. Masonry work
22. Other special trade construction work
23. Installation work
24. Water plumbing and drain laying work
25. Gas fitting construction work
26. Electrical work
27. Insulation work (electrical wiring, water, heat, sound)
28. Fencing and railing construction work
29. Building completion and finishing work
30. Glazing work and window glass installation work
31. Plastering work
32. Painting work
33. Floor and wall tiling work
34. Wall covering and wall papering work
35. Wood and metal joinery and carpentry work

36.Interior fitting decoration work

37.Ornamentation fitting work

38.Building completion and finishing work

39.Renting services related to equipment for construction or demolition of

40.Buildings or civil engineering works, with operator

41.Fire extinguisher setup

IT office solutions:

1. Computer hardware & software
2. Printers
3. IP Phones
4. Access control system (ID reorganization)
5. Attendance machine (Finger print & Card punch)
6. Surveillance Cameras
7. Home of hotel RFID smart door lock
8. Money Counting machine
9. Documents & money safe locker.
- 10.ID card printer

HEAVY EQUIPMENTS DIVISION

**“We provide all these
equipments to our
value-able clients on
demand”**

WE ARE DEALING IN:

1. Piling Rigs
2. Concrete Mixer
3. Vibratory Compactor
4. Batching Plants
5. Concrete Pumps
6. Transit Mixers
7. Dumpers
8. Concrete Placers
9. Welding Machines
10. Planers
11. Drilling Machines
12. Boring Machine
