

# The Route to the Perfect Match

Trust | Visibility | Resilience | Capabilities

## Passionate People, Dedicated to Your Success

Established in 2005 with one simple goal, to deliver innovative Cyber Security solutions and Risk Management services that build trust, confidence and capabilities in the age of digitisation. We take the threat of cyber criminals to undermine healthcare institutions, and organisations very seriously.

We strive to work with the best minds and the most innovative solutions, which is why we are vendor agnostic. Our mission is to transform the way healthcare institutions and organisations build, use and protect patient safety, medical data, proprietary information, intellectual property, and critical infrastructure that bring new and evolving security challenges in a digital age.

Our value-added partnership ecosystem consist of industry-leading and advanced solutions. The primary goal is improving patient safety and outcomes, preventing costly outages, complexity, and operational inefficiencies. Leveraging award-winning AI and Machine Learning technologies that are disrupting the status-quo and fast becoming a game changer across industries worldwide.

## Why Medicare Network

Our ethos is one of collaboration and partnerships, with a bespoke approach for your organisation, quantification of avert threats, identify gaps and effectively manage risks. Independent advice that spans the cyber security lifecycle, helping to develop scalable programs to improve security posture, achieve objectives and goals.

**Our approach is one where we work together with you as a natural extension of your team to:**

- Know your organisation, its challenges and aspirations
- Understand your business and individually tailor our services to enable results to achieve the right outcomes
- Provide a consistently high level of commitment and dedication, whatever the scope of your requirements

Whether you involve us for just a single one-off deliverable, or as an on-going integral partner, the bottom line is not what is important to us, but to ensure that we provide quality services and solutions that meet the brief and more.

Our goal is to deliver exceptional customer care and transparent support to fuel your continued success.

## Helping Organisations Reshape

Let's discover how we can integrate with your business to help you innovate without introducing risk and further mature your Enterprise cyber security program. We provide experience vCISO's, vCTO's and vDPO's to support and optimise your existing challenges, advise on cost-efficiency and design a strategic roadmap to achieve your vision.

### Cyber Security

## Bringing a Proven Approach

We provide strategy and guidance by identifying and tailoring our cyber security, risk management and managed security solutions based on a thorough understanding of your business, objectives and risk profile.

### This approach entails the following steps:

- Define risks and opportunities to manage, mitigate, or transfer
- Design and build solutions to support decision making
- Deliver results

Our aim is to bring a unique perspective to support your organisation plays in reducing your risk in a pragmatic and cost-effective manner.

## People, Process and Technology

We aim to achieve and improve the efficiency and effectiveness of your security environment. We understand that testing your technology to discover security gaps is only part of the overall solution. We can assist you in assessing process and people to achieve a holistic security strategy.

Medicare Network offers a comprehensive cyber security service to address and ensure that all scenarios and possible attack vectors are identified and managed in the event your environment gets compromised, and incidents are quickly contained and remediated.

*“It doesn't make sense to hire smart people and tell them what to do; we hire smart people so they can tell us what to do .”*

## Protecting Your Business

Gaining visibility into our customers risks is critical to protecting patient safety and outcomes, sensitive information and critical infrastructures. Medicare Network goal is to support and protect our customers, recommending the best approach that best meets their organisational needs.

*“Enterprise-wide security is no longer an option — it's Mission Critical”*

Working with you to understand your requirements and goals, our security consultants and professional advisors bring together the right partners to deliver an integrated solution. Enabling you to truly deliver connected and innovative secure solutions right across your organisation.

## Our Commitment

At Medicare Network we value integrity, professionalism and commitment, maintaining relationships with our customers and business partners. Using our years of experience gained in other global industries, by taking the time to fully understand and satisfy your business requirements, objectives and goals.

We are committed to constantly improving our performance and services to deliver a fast, efficient and high-quality service in this increasingly competitive and demanding industry. This continuous commitment is essential in order to help our customers face the daily challenges they are presented with now and in the future.
