Healthy Hooves®

Solutions for Footbaths

**The Footbath Solution
for Dairy Cows**

www.healthyhoovesuk.com

The overuse of Copper Sulphate and Formalin in Dairy footbaths is hazardous to human health and the environment.

Healthy Hooves® is manufactured in the UK as a safe acid solution that solubilises Copper and Zinc Sulphates. Additional additives assist in cleansing the hooves.

Healthy Hooves® contains a buffering system that provides a consistently effective footbath life throughout the processing of 400/500 cows. per 200 litre footbath.

Key Benefits of using **Healthy Hooves®**

- Safer than Formalin
- Reduces Copper Sulphate usage by up to 80%
- Lowers pH in the footbath
- More Cow passes per footbath
- Fast acting, long-lasting and easy to use

Healthy Hooves®

Solutions for Footbaths

4 Litre of **Healthy Hooves®**

+

4 Kg of **CuSO₄**

= **400/500 Cow Passes***
for a 200 litre footbath

Simply Follow These Instructions

For the first 3 weeks footbath twice a day,
five days per week:

4 Litre (2%) of **Healthy Hooves®**
Plus
4 Kg (2%) of **Copper Sulphate**

.....
On-going use footbath twice a day,
three days a per week:

4 Litre (2%) of **Healthy Hooves®**
Plus
4 Kg (2%) of **Copper Sulphate**

**“Reduce the cost
of hoof care”**

For optimum results footbath am/pm 3 times a week.
*Data on File

Copper* solubility at
pH6 is **24%**

Copper* solubility at
pH2 is **85%**

pH2 is achieved when **Healthy Hooves®**
is added to water at 2%

Save money, use less
Copper Sulphate*.

Kinder to the environment.

Reduce the **COST** of hoof care
and **INCREASE** milk yield!

* Zinc Sulphate - Using **Healthy Hooves®** will provide the same
benefits of increased solubility where Zinc Sulphate is used.
